Equine Wellness Programs

Preventative Care is Essential

High Quality preventative medicine is essential to providing your horse a long, healthy life. Fox Valley Veterinary Service will partner with you in providing compassionate and quality health care for your horse.

The Fox Valley Veterinary Service Equine Preventative Care Programs offer each horse the veterinary care that is considered essential to good equine health.

At a substantial savings, you decide which Preventative Care Program best fits the needs of you and your horse.

Additional Preventative Care Savings

25% Discount on Additional Vaccinations

5% Additional Savings for horses enrolled in the 4-H Project.

Horses enrolled in one of the **Preventative Care Programs** will be eligible for a 10% discount on the following services, *provided payment is made at the time service is delivered.*

- **Large Animal Health Profile** – a baseline complete blood count, blood chemistry, and fibrinogen may be used to monitor trends or identify health concerns in your horse.
- **Serum Glucose/Insulin Test** – aids in identifying horses with equine metabolic syndrome, a rapidly emerging health concern in today's horse.
- **Tick Bourne Infectious Screen** – Screen for tick bourne diseases (Anaplasmosis, Ehrlicia, and Lyme)
- **Additional Fecal Egg Count**
- **Microchipping** – protect your horse from loss due to theft or disaster. A microchip is a permanent means of identification.

Booster vaccinations required for previously unvaccinated horses are not included in the Preventative Care Program. Extensive dental work, if necessary, will be billed at the standard rate.

A prorated credit to your account will be granted if the horse is sold or becomes deceased during the 12 months of enrollment provided there is not an outstanding balance on your Fox Valley Veterinary Service Account.
